

ADD 

Francesco Rota | 2014

Francesco Rota | 2014

Nature is a system of endless scenarios. It grows in spring, rests in winter, starts germinating again and arranges and re-arranges the line on the horizon every time. The ADD seating system, an international success, follows the same rhythms and, with the same versatility, also accompanies the pleasure of spending time together outdoors. The primary element, the seed that gives life to everything, is an elegant chair with aluminium base supports, which can be added to in order to become a modular sofa with removable covers. Woods, cornfields, the perspectives of modern architecture spring to mind. An endless ensemble.

Francesco Rota | 2014

Modular seating system with aluminium frame polyester powder coated with webbed elastic support. Two types of recycled die-cast aluminium legs, one for corners and another to connect frames for larger configurations. Each leg type is available in two heights. Backrests can be fixed to the frame in several positions by using pre-drilled holes. Cushions and backrests in moulded fire-retardant polyurethane foam with protective water-resistant and breathable fabric layer and finished with UV stable outdoor fabric. Tops in HPL Fenix® 10 mm. All metal parts are powder coated. Water-resistant protective covers are available.

use and maintenance instructions

Plastic materials, even if intended for outdoor use, may still be attacked over time by particular atmospheric pollutants (e.g. acid rain, high concentration of PM10, nitrogen oxides, hydrocarbons, etc.). Any changes in the surface and in colours may therefore occur under particular conditions of exposure and cannot be considered grounds for any claims.

Do not use detergents containing bleach, hydrochloric acid or products containing chloride on any metal parts. Salt, limescale or acid (from coffee, wine, orange juice, tomato juice, lemon, etc.) may discolour stainless steel parts if they are not promptly cleaned. Products or parts made of stainless steel used near the sea or in interior fittings of swimming pools require more frequent cleaning to remove chloride deposits and prevent corrosion and chemical attack of the external surface. Stains on stainless steel surfaces must be promptly cleaned. If left for a long time they can become permanent.

Outdoor fabrics are lined unglued, therefore any creasing in the upholstery is an inevitable consequence of use and cannot be considered grounds for any claims. To prolong the life of the product, clean the surfaces regularly, dry them with a clean cloth and remove any stagnant water, especially if exposed in locations with a high level of humidity or a marine climate.

When not in use, we recommend storing in sheltered places and covering with waterproof protection. In this case, it is advisable to remove the cover and ventilate the product frequently and regularly to avoid the onset of any mould or stains due to damp.

THE WARRANTY WILL NOT COVER DEFECTS OR IMPERFECTIONS RESULTING FROM THE PASSAGE OF TIME OR TO WEAR AND TEAR DUE TO THE NORMAL USE OF THE PRODUCT.

ADD SOFT

Francesco Rota | 2018

Francesco Rota | 2018

Nature loves softness, in all seasons. Dunes, sea waves and sparkling snow in the early morning sunlight. The ADD SOFT seating system, with an aluminium frame and elastic straps that ensure support and gentle relaxation, has been inspired by this delightful softness. It has deep and generous cushions, an embracing profile and offers infinite combinations. Like landscapes, a garden, a terrace, the outdoor space of a restaurant, even an outside area of an office. You can sit down, relax, work and imagine yourself on a surfboard.

ADD SOFT

Francesco Rota | 2018

ADD SOFT

Francesco Rota | 2018

Softness is possible. And you can imagine an office that accommodates wide and spacious seating. Time for meetings or simply more time, as at home. In the name of relaxation, the ADD SOFT seating system adds depth and opens up to the most successful art of combinations. With its embracing dimensions, the legs of the frame are reduced in height to make space for comfortable cushions. The tabletops with electric sockets complement the functionality of the sofa. And it is a pity to get up from it.

use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spilt on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
